

1. Click on 'Connect Jira' Button and provided all the details in the Model Dialog screen and clicked on 'Connect' Button so that Jira connection established.

2. Click on 'Load Stories' Button, so that Jira User stories loaded.

3. Click on any one of the buttons 'User Story in Form', and click on 'Generate Test Cases' button so that Test Cases generated for all stories

The screenshot shows a web application interface for managing user stories and generating test cases. The browser address bar shows 'localhost:5173'. The interface is divided into two main panels.

Left Panel (User Story Form):

- Story Title ***: US-101 - User can sign in with email and password
- Summary**: User can sign in with email and password
- Description**: As a returning user, I want to sign in with valid credentials so that I can access my dashboard.
- Acceptance Criteria ***:
 1. Login form accepts registered email and password
 2. User is redirected to dashboard after successful login
 3. Error message is shown for invalid credentials
- Additional Info**: Status: To Do, Priority: High
- Buttons**: [Generate Test Cases](#) (green), [Connect Jira](#) (green), [Load Stories](#) (blue)
- Status**: Loaded 4 user stories.

Right Panel (Generated Test Cases):

Generated Test Cases (highlighted with an orange box)
